

**3<sup>RD</sup>-5<sup>TH</sup> APRIL**

*221B, Baker Street. He's back. And he was looking for this very opportunity to announce his presence. Every fairy tale needs a good old fashioned villain. But with Sherlock not in town, it's no more a fairy tale. Can you match his intellect and keep the game in balance? Do you have it in you to confront Moriarty?*

*Solve clues, think outside the box and prove yourselves in this game of alertness and concentration.*

## GAME RULES

- Each team may consist of a maximum of 2 participants. You can fly solo, if you wish to.
- Various questions involving ciphers and steganography will be provided to you. You will simply have to give us the flags, which will be hidden inside the questions.
- Knowledge of computer programming won't be required to solve the problems.
- Although the event will be conducted on Linux, absolutely no knowledge of Linux will be required to solve the problems.
- Teams won't be allowed to use any external electronic devices.
- Internet Access may be provided to the participants. In case it is not, we will provide you with almost all the knowledge, you will require to crack the questions.
- In event of a tie, the team to solve the most difficult questions first, will be considered the winner.
- Decision of the co-ordinators will be final and binding.
